

Dedicated Server

Your own server tailored to your needs.

Server Hosting at Genotec means also:

- Unlimited root/administrator rights
- Around-the-clock support
- Control center
- Server site in Switzerland

Highest quality standard!

With Dedicated Server (Windows, Linux or Unix) you get a complete server at your sole disposal. Thanks to unlimited root and administration rights, you can configure your dedicated server individually according to your needs and requirements. The quality seal «Swiss Quality Hosting» of simsa guarantees a high quality standard of our hosting services to our customers.

The Dedicated Control Center puts a centralized administration interface at your disposal which allows for the fast and easy access to a multitude of other functions. This encompasses, besides our primary and secondary DNS services, access to monitoring and backup functions, etc.

In order to adapt a Dedicated Server exactly to your needs, it's possible to supplement each server with additional options. Our System Management options give you the possibility to transfer, according to your needs, part of or the entire administration of

your services to our experienced technicians. The monitoring systems permits to establish a stable and secure surveillance of your server within a very short time. We also offer different features which facilitate your work in the backup and recovery areas.

Server Hosting

Don't hesitate to contact us.
We're happy to advise you and to
give you helpful hints.

Our competences include, besides the classical server solutions, the establishment of platforms in the clustering and load balancing areas.

Manufacturer

By choosing Hewelett-Packard, 2011 Preferred Partner  Genotec commits itself to the highest level of quality and innovation. Thanks to HP as our partner for servers, we can always offer the perfect solution.
