

Virtual Server

The perfect platform for first-time users and Web projects.

Highest quality standard!

Server Hosting at Genotec means also:

- Unlimited root/administrator rights
- Around-the-clock support
- Control center
- Server site in Switzerland

With a vServer (Windows, Linux or Unix) you get a virtual server for your exclusive use. Thanks to unlimited root and administrator rights, you can configure your server individually according to your personal needs and requirements.

The Dedicated Control Center puts a centralized administration interface at your disposal which provides you with an easy and fast access to a multitude of other functions. Besides the use of our primary and secondary DNS services, this also includes access to monitoring and backup functions and to much more.

Genotec offers you a large range of operating systems in the Windows, Linux or Unix areas. Take advantage of the merits of the particular operating systems for your own applications. For applications such as Typo 3 or Joomla, Linux is the first choice. A virtual Windows server is suited for applications which have been developed on ASP or .NET, as well as for the use of Windows Services (e.g. SharePoint).

Server Hosting

Don't hesitate to contact us.
We're happy to advise you and to
give you helpful hints.

Technical background

Genotec's vServer environment is based on Microsoft Hyper-V und VMware ESX. This high-performance infrastructure offers a very high standard with regard to resilience and performance. Benefit from attractive offers and take advantage of the many benefits of virtualization.
