

Dedicated Virtual Host

Less worries, lower cost,
higher utilization.

Tailor-made
solutions

- Reduce operating and hardware costs by
- Optimizing server load
- Standardizing the system topography
- Enhancing flexibility and scalability
- Increasing availability

Use the possibilities

With a Dedicated Virtual Host you get a dedicated server with preinstalled virtualization software (Hyper-V) on which you can build your environment in an optimal way. With centralized management, scalability, monitoring, and other fantastic features, this offer lets nothing to be desired. The simsa quality seal "Swiss Quality Hosting" guarantees to our customers that our hosting services comply with high quality standards.

The Dedicated Virtual Host as stand-alone solution is widely used for the outsourcing of Internet services (for example Web, file, e-mail/Exchange, SQL, Sharepoint, etc.), but is the ideal solution for major Web projects, sowie im Verbund von Servern.

Everything at a glance

With the Hyper-V Virtual Machine Manager, you can have a look at what's happening on your virtual instances any time you wish. It also allows to create new servers easily by imaging existing ones.

The System Center Virtual Machine Manager allows you to gain a good overview of multiple servers and puts additional awesome features at your disposal.

The SCVMM enables you to manage the entire server infrastructure from a single point. In addition, you benefit from highlights such as template administration, clustering, load balancing.

Internet made easy

Our Dedicated Virtual Host offer

Price per month (excl. VAT)	CHF 499.-
RAM	12 GB
CPU	XEON Quad-Core
Hard disk	2x 500 GB HDD
IP addresses (IPv4/IPv6)	5
Traffic	unlimited
Network	100 MBit/s
Network connections	2
Windows Server 2008	Enterprise Edition
Administration	Hyper-V Manager
Backup	30 GB
Monitoring	10 Ports

Supplementary options

Put together your perfect server. Our options/managed services allow you to adapt every server to your needs.

System Center Virtual Manager (per environment)	CHF 69.90
System Management (per customer)	CHF 150.-
13 IP addresses	CHF 50.-
Windows Server 2008 Datacenter	CHF 99.90
iLO Advanced Management	CHF 49.90
Firewall Entry	CHF 99.-

Prices per month excl. VAT

Do you have special requirements?

In the world of virtualization, there are hardly any limits to your ideas. Whether a redundant server design or a background storage solution, we can offer you manifold scenarios.

“Virtualized environments are the future for every company, the advantages of a Dedicated Virtual Host are clear for all to see.”

Dedicated Virtual Host – all inclusive!

A Dedicated Virtual Host provides you with your environment with the perfect supplementary options (backup, monitoring, IP addresses).

Server By choosing Hewlett-Packard products we commit to highest server quality. Thanks to the supplementary coverage through the guarantee of Genotec, you don't need to worry about the hardware.

Licences The Windows Server 2008 licences for five servers (host system and four virtual servers) are already included in the offer.

Software Apart from the Windows licenses the scope of supply encompasses also the Hyper-V Machine Manager, which provides for the centralized administration. New servers can be installed comfortably by means of a pre-designed template.

Monitoring If a problem occurs with your server, you will be notified at your discretion by SMS or e-mail. In this way you can define ten monitoring (for example ping, performance, memory usage, etc.).

Remote Management Thanks to the integrated technology (iLO) from HP you can communicate with the server even if it isn't responding anymore via Remote Desktop.

Backup The 30 GB backup memory enables you to secure your data on an external backup server.

We're happy to advise you on your individual server project and are looking forward to your enquiry.
